PROJECTS

Retail Sales Performance Analysis — Google Sheets, Pivot Tables, Dashboard Visualization

<https://github.com/SHudson30/retail-sales-performance-analysis>

Conducted analysis of \$2.3M in retail sales data across 9,994 transactions, evaluating regional performance, customer behavior, and product category profitability. Built KPI reports and dashboard visualizations to communicate insights, identify trends, and support business decision-making.

Automated SEO & Growth Analytics Pipeline — Python, SQL, Pandas, SQLite3, Git, GitHub

<https://github.com/SHudson30/seo-analytics-pipeline>

Built a cloud-native ETL pipeline that programmatically ingests messy web search metrics, automates data cleaning and text normalization via Pandas, and loads the structured data into an optimized relational database schema for analytical SQL validation.

CERTIFICATIONS

Boot.dev Data Analyst Learning Path — Python, SQL, Pandas, and Power BI

Sept 2026 - Present

Using Python, SQL, Pandas, Polars, and Power BI to collect, clean, query, analyze, and visualize data. Also practicing supporting skills like Git, Linux, web scraping, and working with APIs.

EXPERIENCE

Oak Harbor Tech, Grand Rapids, MI — Lead Data & Analytics Analyst

May 2026 - PRESENT

- Engineered programmatic data pipelines using web analytics APIs to ingest, clean, and monitor performance KPIs, reducing manual analytical loops while improving acquisition visibility.
- Conducted exploratory data analysis (EDA) on behavioral and traffic datasets to automate diagnostic dashboards, translating complex transactional metrics into actionable stakeholder trends.

Richuel, Los Angeles, CA — Marketing Data Analyst Apprentice

Feb 2026 - May 2026

- Aggregated and parsed large marketing datasets to build cross-functional exploratory visualizations, driving return-on-ad-spend (ROAS) optimization and trend tracking.
- Spearheaded data validation and schema cleaning processes across raw datasets, utilizing statistical frameworks to isolate anomalous metrics and identify granular customer patterns.

SKILLS

SQL
Python
R
MS Access
Git
GitHub
Data Analysis
Exploratory Data Analysis (EDA)
Data Visualization
Dashboard Design
KPI Reporting
BI
Data Storytelling
Pivot Tables
Excel
Google Sheets
Marketing Analytics
PostHog
Pandas
Matplotlib
Technical Documentation
Reporting
Research & Analysis

EDUCATION

B.S.
Data Science (Major), Digital Marketing (Minor)
University of Phoenix
2024–Expected Winter 2027
